INTRODUCTION

This is a report for Web development projects on personal web page and weather app assigned to us as a part of MLSA internship program associated with Kiet Group Of Institutions.

BODY

It consists of a personal web page which Includes codes for simple introduction about the author and a weather app which is for weather forecasting related to temperature,humidity,wind speed of entered location.

CONCLUSIONS

This project is really very helpful in various aspects which also develop confidence in the author. Both personal web page and weather app are really useful in their respective domains.
